EDUCATION

Eastern Michigan University

Bachelor of Science in Computer Science

April 2025

Ypsilanti, MI

- GPA: 3.99; Dean's List 2021 – 2025; Mathematics Minor; Departmental Honors

EXPERIENCE

Truss

Remote, MI

Full-Stack Software Engineer

Apr 2025 – Present

- Developed and maintained full-stack solutions for the Truss application using **Ruby on Rails**, **JavaScript** & **Tailwind**, delivering features, bug fixes, and enhancements to 1000s of users
- Building a **Node.js** & **React** microservice for e-signatures to reduce vendor costs by **\$50,000/year**
- Developing a **React Native** mobile app for bulk scanning to save firms hours on paper document migration
- Built an integration with Karbon that directly resulted in **5+** accounting firm acquisitions
- Deployed **AWS CloudFront** as a CDN with **Route 53** & **ACM** for caching, offloading **90%** of static asset traffic

Software Developer Intern

Sep 2023 – Apr 2025

- Implemented secure & scalable client communication solutions including invite & scheduled emails, SMS messaging & URL shortening through Truss using **Twilio** & **SendGrid**
- Maintained a fork of the CombinePDF gem by fixing various bugs and extending to encrypted & malformed pdfs
- Built a document scanner using **JavaScript** & **OpenCV** streamlining workflow & reducing upload times by 50%

University of Michigan

Ann Arbor, MI

Software Developer Intern

May 2024 – Aug 2024

- Built and deployed a full-stack **Ruby on Rails** application, [LSA SpaceReady](#), to streamline daily inspections for 300+ classrooms across the University of Michigan
- Designed a CI/CD testing pipeline using **GitHub Actions** & **RSpec**, achieving 90% test coverage
- Led the development of Trackmaster 2.0 for the Eisenberg Family Depression Center, managing enhancements to the **SharePoint** site, building **Power Automate** flows & designing **Tableau** dashboards

Eastern Michigan University

Ypsilanti, MI

Research Assistant – Deep Learning

Jan 2023 – Apr 2024

- Implemented quantization & pruning on **InceptionV3** models using **PyTorch** & **Distiller** to explore fairness across demographics in dermatology images
- Spearheaded development of [CodeContext](#), leveraging modern **NLP** & **machine learning** techniques with **LLMs** (BERT, BigBird, GPT) using **Hugging Face** & **PyTorch** for generative code documentation
- Secured a total of \$6,500 in research funding and presented work at 4 conferences

PROJECTS

MLite

AWS, Ruby on Rails, Flask, Docker, PyTorch, Scikit-Learn, PostgreSQL, JavaScript

GitHub | <https://github.com/COSC481W-2024Fall/MLite>

- Led a team of 5 to build a machine learning infrastructure application for non-technical users to train & deploy **MLP**, **XGBoost**, and Regression models
- Built a **Ruby on Rails** application utilizing **AWS RDS** & **S3** for storage & **SQS** for queuing training jobs
- Dockerized** and deployed 2 **Flask** servers through **AWS ECS Fargate** to manage model training & deployment

TECHNICAL SKILLS

Languages: Python, Ruby, JavaScript, HTML/CSS, C#, Java, Rust, C++

Software Engineering: AWS (EC2, Lambda, ECS, Fargate, RDS, CloudWatch, SQS), Google Cloud, SQL, MongoDB, Git, Linux, Jira, Tableau, Docker

Frameworks: Ruby on Rails, Flask, PyTorch, Hugging Face, Node.js, React, React Native, Scikit-Learn, Unity
